

commit.interval.ms

- Implementation detail - the frequency with which to save the position (offsets in source topics)
- Defaults to 30s for **at-least once** streaming applications

Use case: notifications

```
(-> (.stream "payments")
    (groupByKey)
    (aggregate
      (constantly []))
      (fn [_ _ v aggregate]
        (conj aggregate v)))
    (toStream)
    (to "notifications"))
```
